## Introductions for 1945

### RIVIERA

(Yoder Bros.)

A luminous pink decorative pompon blooming normally about December 10, just nicely following Minuet. This variety finishes beautifully, maintaining its color and form much better than existing varieties that bloom at the same season. The flower is showy and of good substance. Its heavy petallage permits an extended season of cutting. The plant is vigorous, of medium height and top production. The spray resembles that of Snow, being extremely rigid and well branched. Foliage is small with a very strong stem. A productive variety having a color and season in great demand.

**Price for Rooted Cuttings, \$125.00 per 1000**

### BITTERSWEET

(Yoder Bros.)

A beautiful medium sized bittersweet red daisy that blooms normally November 8. The flower possesses substance and keeping qualities that are superior to any existing red daisies suitable for cloth house culture. It retains its brilliance with full maturity. The flower has from three to four rows of stiff, broad petals that lay perfectly flat giving a fresh, lively and attractive appearance. Bittersweet has a stiff wiry stem that produces well branched sprays. The foliage is small, dark green and glossy. It responds well to black cloth treatment. It bunches well and because of its striking color and attractive foliage it compels attention when displayed with other varieties. A better cloth house red daisy and a good running mate for Sylvanna. Awarded gold medal National Chrysanthemum Show 1943.

**Price for Rooted Cuttings, \$125.00 per 1000**

### COCQUETTE

(De Petris)

Large button type pompon. Color clear golden yellow, with good form and hard substance. Of free easy growth with good production. Stems strong and upright attaining medium height. Matures November 12 to 15. A desirable yellow button pompon flowering at a period when button varieties are not plentiful. Cocquette will be found to produce well and extremely free and easy to grow.

**Price for Rooted Cuttings, \$125.00 per 1000**

### BARCAROLE

(Yoder Bros.)

An intense golden yellow pompon that blooms normally November 5. It is a very formal flower and possesses excellent substance. The habit of growth is outstandingly vigorous. It is of extremely easy culture and its smart, dark, glossy foliage, its rigid sprays and very high production mark it as a real bread and butter variety. It has proven a valuable variety for black cloth shading, flowering with Nuggets when shaded with that variety. Barcarole has shown no sensitivity to cultural conditions, being easily grown on either raised benches or ground beds. We suggest that those who now grow Mary L. Hall under black cloth will find Barcarole a more satisfactory variety. Awarded gold medal National Chrysanthemum Show 1943.

**Price for Rooted Cuttings, \$125.00 per 1000**

### VESPER

(Yoder Bros.)

This variety is the result of an attempt to combine the flower quality of Rev. Bushnell with the free growth and high production of Sea Gull. It is a glistening white pompon that blooms normally November 10. The flower is very pure in color and has unusually good substance. The form is beautiful and its heavy petallage permits a long period of cutting. Free growth, easy culture, and a well branched spray rank Vesper with the best of the early dependable varieties now in use. This unique combination of flower quality and free growth habit plus its favorable response to black cloth treatment should make this variety very popular. Gold Medal National Chrysanthemum Show 1943.

**Price for Rooted Cuttings, \$125.00 per 1000**

### TRIANON

(De Petris)

Crimson bronze pompon with a good and appealing color. Perfect form and hard substance. Growth is free with clean medium sized foliage and good stems. Matures November 12. Trianon will produce a good average of upright sprays. It is easy to grow and produces a good quantity of perfectly rounded blooms with both good form and substance. It blooms at a period when deep bronze pompons are not plentiful.

**Price for Rooted Cuttings, \$125.00 per 1000**
